Key Business Insights

- Sales show strong growth from 2014 to 2017.
- Technology is the most profitable category.
- Furniture generates comparatively low profit.
- West region contributes the highest sales.
- Consumer segment is the primary revenue driver.
- Higher discounts negatively impact profitability.
- Sales peak during November and December.
- Standard shipping dominates but is slower.

Recommendations

- Control discount strategies to improve profitability.
- Focus on high-performing categories like Technology.
- Improve cost efficiency in Furniture category.
- Expand in underperforming regions.
- Optimize logistics for faster delivery.

Conclusion

This project demonstrates a complete data analysis workflow including data cleaning, transformation, visualization, and business insight generation. The findings provide actionable recommendations to improve business performance.
